

Technology could support your learning by helping you:

- communicate in school
- see or read your school work
- make notes in class
- remember information
- hear what is being said in class
- work by yourself
- sit exams

How do I ask about technology to help me with my learning?

- Speak to your class teacher or the person who is responsible for your support at school.
- If you have a support plan, ask to talk about the use of technology at your next planning meeting.
- Share with your school any ideas about technology that could help you - maybe you already use something at home that could help at school?
